

# Smart Farm Kits

## Water Measurement Kit

This LoRaWAN kit provides farmers with real-time water data to cut waste, detect leaks, and improve sustainability.

### What do I get in my free kit?

#### Water meter with remote monitoring facility

Provides accurate, real-time water consumption data. Suitable for pipes with up to 50mm diameter.

#### 24 Months data services

Includes LoRaWAN network, data storage, and data visualisation with user login.

### Benefits?

- ✓ Smart real-time water metering
- ✓ Early leakage detection
- ✓ Groundwater level monitoring
- ✓ Irrigation system monitoring and control
